

# Bag Filter BFR

- A continuous operation dust collector with excellent power saving, low noise and filter life performance. Ideal for dust collection on high speed processing lines.
- Featuring highly efficient turbofans developed by Inoue Densetsu. You can select the number of fans in operation and control the rotation speed (optional) to enable power saving operation matching the required air volume.
- Equipped as standard with explosion vents, temperature sensors and water fire extinguishing piping. A combination of spark detectors and spark shut-off valves enables more safe and secure dust collection.

**BFR5W × 6**(37kW×3)

**BFR4 × 6**(37kW×2) Two units

**BFR5 × 6**(22kW×3) Truck loading **LCA500**
